Professional Summary

Results-driven Software Engineer with **nearly 1 year of experience**. Proficient in React.js, Next.js, and Node.js, with strong algorithmic problem-solving skills (**solved 700+ algorithmic problems**). Proven track record at **Quad Theory Ltd** optimizing backend architecture and geolocation features. Remote collaborator focused on clean code and high-impact delivery.

Core Skills

- Programming Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- Frontend Development:** HTML5, CSS3, Tailwind CSS, React.js, Next.js, Redux Toolkit, Framer Motion
- Backend & Frameworks:** Node.js, Express.js, RESTful APIs, Socket.IO, JWT Authentication
- Database Management:** MongoDB, MySQL, Microsoft SQL Server (MSSQL), Mongoose
- Tools & Platforms:** Git, GitHub, Vercel, Figma, Postman

Professional Experience

Software Engineer | Quad Theory Ltd (Remote)

October 2025 – Present

- Commercial Feature Architecture:** Engineered a scalable order-handling framework for GoTaste UK with dynamic pricing and automated refunds, reducing support tickets by 30% and boosting speed by 20%. (<https://gotaste.uk>)
- Geolocation & Filter Integration:** Integrated Google Maps API and geospatial indexing to power restaurant discovery, improving search accuracy by 25% and reducing user drop-off during location selection.
- Subscription & UI Security:** Architected a role-based access control (RBAC) system for subscription tiers, securing 15+ admin routes and ensuring 100% compliance with plan-specific data visibility requirements.

Projects

- Chattr – Real-Time Chat Application** | [Live Site](#) | [GitHub Repository](#)
 - Technologies Used:** MongoDB, Express.js, React.js, Node.js, Socket.IO, Tailwind CSS
 - Bi-Directional Communication:** Engineered instant messaging functionality leveraging Socket.IO for persistent, full-duplex WebSocket connections and live state updates without page refreshes.
 - Data Persistence & Layout:** Structured MongoDB database models for secure message persistence, designing a responsive UI that dynamically aligns threads and timestamps based on user roles.
- Quickblog – AI-Powered MERN Blog Platform** | [Live Site](#) | [GitHub Repository](#)
 - Technologies Used:** MongoDB, Express.js, React.js, Node.js, Google Gemini API, JWT, ImageKit CDN
 - Full-Stack Architecture:** Built a decoupled MERN client-server layout featuring robust stateless token authentication (JWT), secure role-based admin routing, and dynamic Mongoose validation schemas.
 - AI Engine & CDN Pipelines:** Integrated Google Gemini API to auto-generate blog drafts, reducing writer time by 40%. Implemented ImageKit CDN for live WebP compression, boosting Lighthouse performance scores by 25%
- Crypto Tracker – Live Market Dashboard** | [Live Site](#) | [GitHub Repository](#)
 - Technologies Used:** React.js, React Router DOM, React Context API, react-google-charts, CoinGecko API
 - State Management & API Integration:** Leveraged React Context API for global state management to consume CoinGecko REST endpoints, managing live market metrics, coin details, and historical data.
 - Data Visualization & UX:** Built an interactive data dashboard incorporating react-google-charts for multi-timeline historical trend tracking, featuring client-side route guards and dynamic search parsing.

Competitive Programming & Leadership

- Algorithmic Problem Solving:** Solved **700+ problems** across platforms, including **Codeforces (Max Rating: 1298, Pupil | [Profile](#))** and **CodeChef (Max Rating: 1676, 3 Stars | [Profile](#))**.
- Leadership (2022–2024):** Executive, DIU CPC (**ACM Wing**). Mentored **50+ students (+20% pass rate)** and hosted contests.

Education

Daffodil International University

B.Sc. in Computer Science and Engineering

2020-2024

CGPA: 3.52 (Out of 4.00)
